August, 2019

The rope horse industry has never had an event like this to-date. The American Rope Horse Futurity Association was founded to help increase the value of our equine athletes in one of the industry's most popular events, team roping. This event is not just a race against the clock where the fastest time will take home the prize, but it is created to make an even playing field for anyone and everyone with a judged score and a time score. This is what makes this event exciting for the rope horse industry!

Whether you are at the pro level or a weekend jackpotter, this event is adding value into our horses' resumes and, in return, will provide events where a great group of cowboys and horses to compete, while bringing some standout horses into the horse market.

The ARHFA is becoming very popular with competitors and owners and is making a big splash with spectators as well. The events that have been added to the ARHFA Show Schedule have deemed themselves worthy of the addition so far in 2018. With added money and a level playing field, cowboys and owners are seeking out a place to take these young horses to vie for a piece of the purse. The events in 2018 paid out over \$505,000. The ARHFA is expecting record numbers at the 2019 World Championship Show, after a strong showing in 2018, the second year it was held. New to the 2019 ARHFA events schedule will be Non-Pro classes featured at every ARHFA hosted event. The ARHFA World Championship Show exploded with entries last year and exceed everyone's expectation once again. The future looks bright for the association and we are expecting 2019 to bring even bigger numbers and payouts with the amount of horses, trainers, and owners that are as equally excited about these new events as the founders of the ARHFA are. In 2018, the ARHFA hosted over 695 entries and is expecting well over 1000 entries, with the addition of the Non-Pro classes held in conjunction with all the ARHFA events. We estimate record setting payouts of over \$600,000 for 2019. There are some fun and exciting changes happening within the ARHFA as well with the addition of a select group of horses to be sold at the NRCHA Futurity Sale, and the addition of the National Rope Horse Development Program.

With these growing events and a national spotlight to the rope horse industry there has never been a more exciting time to join forces with the ARHFA to promote a huge portion of the equine industry and do it without limitations or doubt.
